Reiki & Therapeutic Touch

Reiki is a Japanese relaxation technique that is an effective complement to conventional medicine. Reiki helps to elicit the “relaxation response” and assists in restoration of the mind-body balance. Reiki encourages enhanced functioning of the body’s healing systems and promotes self-healing on all levels - physical, mental, emotional, and spiritual.

Therapeutic Touch involve a gentle non-invasive use of the hands near and sometimes on an individual with the intent to assist the body with its own natural healing ability

Salem, 400 Highland Ave. Suite #13
